

Ian Adamson

Background and career history

After leaving school Ian had a variety of jobs, including a number of middle management positions. However in 1994 he returned to full time education, graduating from the University of York with a BSc Honour's degree in Biology in 1998.

In August 1998 Ian was employed by Dyno-Kil as a Biologist. He soon became pivotal in the Technical Department of this fledgling company, developing and writing:

- The technician's training program, consisting of theoretical and practical pest control skills development.
- The one week rapid training program, a training course for surveyors.
- The technical field based staff operations manual.

Dyno-Kil was acquired by Igrox in 2000. As well as his routine Field Biologist role Ian assisted with the smooth transition and amalgamation of the two companies systems and helped in trials of new services and working practices for the Field Biologist team.

Igrox was acquired by Connaught plc in July 2009. After 12 years continual service in the three different companies, Ian joined Acheta in August 2010. He is a BPCA Certificated Field Biologist, and also a certified trainer.

Relevant Qualifications and Memberships

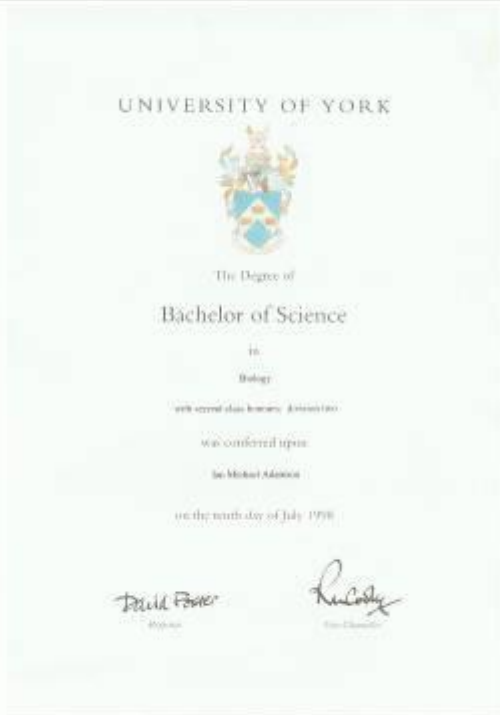

BPCA Certificated Field Biologist
